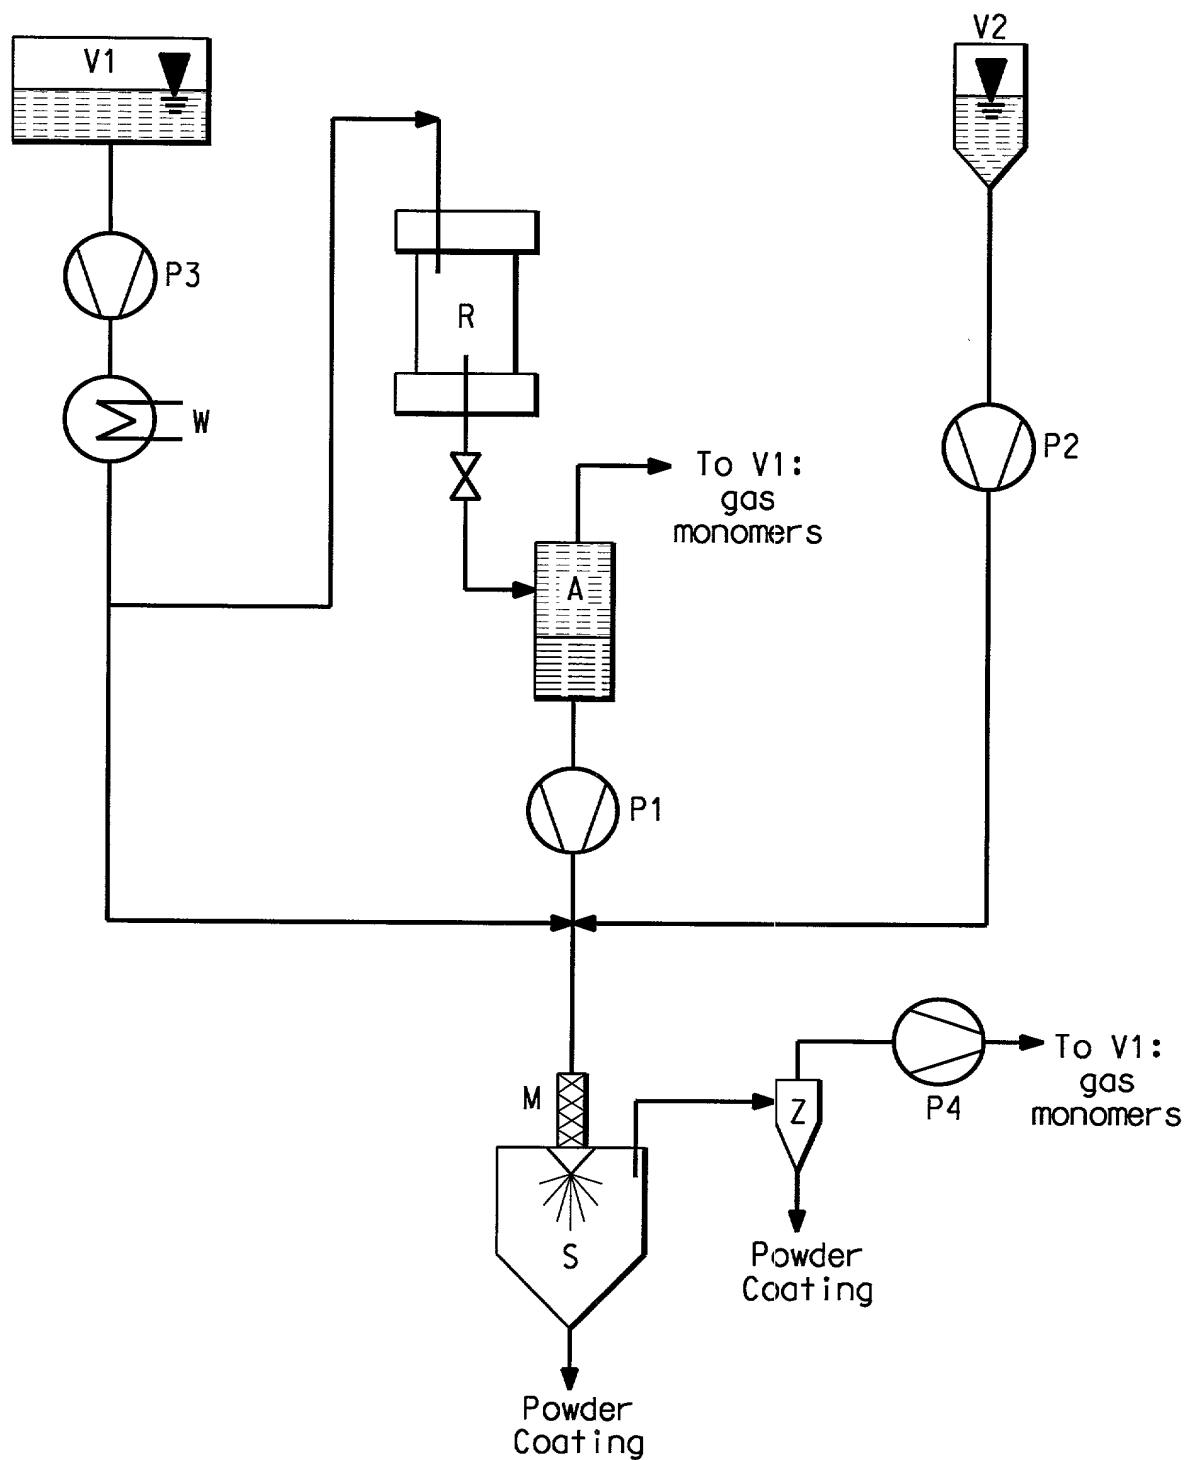

FIG. 2

FOE280" 6T95E660

Figure 6. The effect of the initial concentration of the monomer (C_0) on the polymerization rate at different temperatures. The reaction conditions were: $[AIBN] = 0.001 \text{ mol/L}$, $[M] = 0.01 \text{ mol/L}$, $[H_2O] = 0.01 \text{ mol/L}$, $t_p = 180 \text{ min}$.
